FREIGHT SERVICES

Consistent service across the globe

Your reputation and success depend on whether you receive or deliver your products on time and at a reasonable cost from any part of the world. With your supply chain spanning continents, the move from manufacturing source to your warehouse could become risky and complex. What you need is a reliable and cost-efficient partner that manages the delivery of your cargo by sea and air, or a combination of both.

Air freight

Geodis Wilson offers air freight at three speeds for optimal balance between time and cost: *Economy, Regular* and *Priority*. Our own terminal handling, regular performance reports and door-to-door service guarantee an unbroken chain of responsibility. We also offer cross-trading, which means we handle cargo through any airport irrespective of where you are located. Our Cargo2000 compliance ensures consistently high levels of performance, such as quick solutions to deviations.

Sea freight

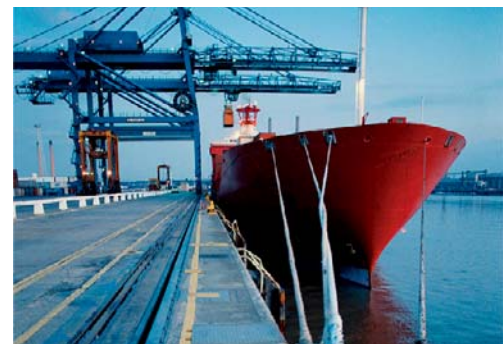

We offer door-to-door service for less-than-full-container shipments (Pipeline LCL) and full container loads (Pipeline FCL), both in standardised containers and as refrigerated or oversized cargo. We offer frequent and time-definite departures to and from the world's major ports, meaning transit times and arrival dates are pre-set. We have full control over the entire chain and offer status reports, making our services faster and more reliable.

Sea-Air Combined

We pioneered the Sea-Air Combined concept, which is 30-50% faster than sea freight and 30-50% cheaper than air freight. This service is available from 14 Asian countries to Europe, North America and Latin America. We ship freight to our terminals in Dubai (United Arab Emirates), Los Angeles (United States) or Incheon (South Korea) and then fly it to its final destination. Sea-Air cargo is the last to be loaded and the first to be unloaded, reducing transshipment time and damage risk.

Value-added services, e-services and integrated solutions

Geodis Wilson also offers value-added services that release tied-up capital while your goods are in transit. These include stocktaking, testing, pick & pack, labelling and bar coding. In addition, we offer customs clearance services and transport insurance. We also offer e-services such as our web-based Freight Monitor and Freight Planner tools, as well as a customer portal. By combining freight services, value-added services and e-services, we create integrated solutions that make our customers more competitive.

Introducing Geodis Wilson

Geodis Wilson makes customers more competitive by delivering their cargo across five continents by sea and air and by making their supply chain transparent and easy to manage. Geodis Wilson has 4,600 employees in 44 countries. Geodis Wilson is the result of the merger between Geodis Overseas and TNT Freight Management, a 164-year-old company formerly known as Wilson Logistics. It is the freight management expert of the Geodis Group, a global logistics provider with 26,000 employees in a network covering 120 countries.
