FREIGHT SERVICES | OUR SEA-AIR APPROACH

'Cost-effective sea-air freight services'

We understand that shipping from the Far East to Europe and the Americas brings its own set of challenges. Each customer has unique requirements when it comes to deadlines. Sea freight is perfect for stable delivery times of goods that can be handled at a slower pace. Air freight is the shipping method of choice for urgent, time-sensitive deliveries.

But what about customers who fall in the middle?

Geodis Wilson's sea-air approach combines the advantages of sea freight with the speed of air freight to create tailored, transparent and cost-effective solutions that meet your needs – and the needs of your customers.

Geodis Wilson, your freight management partner

Combining time and cost savings

Cost-effective logistics

Business delivery scenarios can change by the minute. We have a proven sea-air track record of partnering with a wide variety of companies. In order to meet industry-specific challenges and reduce costs, we optimize supply chains in areas such as automotive, high-tech, textiles and many more. With transfer locations in Dubai (United Arab Emirates), Los Angeles (United States) and Incheon (South Korea) you will receive a global, personalized solution that will give you the time you need to focus on your business.

Total control and real-time tracking and tracing

Freight management is all about maintaining full control at all stages, everywhere. We provide fully centralized logistics development, dispatch administration and operational handling, and our e-services allow full transparency, a customized portal to provide booking services and proactive quality control and real-time 'track and trace' tools. Best of all, you will receive one-stop shopping and global pricing with a simple rate structure, no matter where your business is located. Full control. Every step of the way.

Fully-owned Far East terminals and dedicated sea-air teams

Geodis Wilson is strategically located around the world with teams committed and dedicated to sea-

air logistics and fully in control of our Far East transfer locations. We will make sure that your goods are the last cargo to be loaded at the port of departure and the first to be unloaded at the point of transit, which will reduce shipment time and lower costs. Our superior account management and strong network can match the needs of even the largest global companies and we also take full responsibility from start to finish – our experienced staff will handle the shipments efficiently and safely through the entire transport.

Supply chain improvements and a competitive edge

Our sea-air approach is intended to provide you with services geared to your specific requirements. Aside from our range of freight services, you can choose from a variety of value-added services such as cargo insurance and customs clearance, as well as e-services and integrated solutions to provide you with a tailored competitive edge. We can also use our Cost Analysis Tool to highlight potential process improvements throughout your supply chain, which can lower overall costs considerably. It is a continuously customized solution from a partner who understands the challenges you face.

Sea-air freight services. The right combination for you and for your customers.

Introducing Geodis Wilson

Geodis Wilson is a leading global freight management company. With 6,000 employees in more than 50 countries it delivers tailor-made, integrated solutions to customers, therefore enabling them to operate as 'best in class'. Geodis Wilson manages sea and air cargo across five continents, making supply chains transparent and flexible to handle. As the freight forwarding division of the Geodis Group, Geodis Wilson grew out of the merger between Geodis Overseas, TNT Freight Management and Rohde & Liesenfeld. In November 2008, the company became part of the French rail and freight group SNCF. With its now 50,000 employees located in 120 countries, SNCF Geodis ranks among the top six companies in its field in the world. Visit Geodis Wilson online: www.geodiswilson.com
